

Table of Contents

Preface	xiii
ACoRN Overview	xv
What is ACoRN? What are the objectives of the ACoRN Program?	xv
What is the ACoRN Textbook?	xv
What is the ACoRN Workshop?	xvi
Chapter 1 The ACoRN Process	
Objectives	1-1
Key Concepts	1-2
The ACoRN Framework	1-3
The ACoRN Process	1-5
Illustrative Case Study	1-12
Summary	1-14
Sequences	
Resuscitation	1-15
Respiratory	1-16
Cardiovascular	1-17
Neurology	1-18
Surgical Conditions	1-19
Fluid & Glucose Management	1-20
Thermoregulation	1-21
Infection	1-22
Chapter 2 Resuscitation	
Objectives	2-1
Key Concepts and Skills	2-2
Introduction	2-3
Resuscitation Signs	
Ineffective breathing	2-3
Heart rate < 100 bpm	2-3
Central cyanosis	2-4
The Resuscitation Sequence	2-5
Core Steps, Organization of Care, Response, and Next Steps	2-4
Case 1 – Apnea during feeding	2-10
Case 2 – Apneic episodes in a preterm baby	2-13
Answers to Questions	2-16
Bibliography	2-16
Chapter 3 Respiratory	
Objectives	3-1
Key Concepts and Skills	3-2
Introduction	3-3

Table of Contents

Alerting Signs	
Labored respiration	3-6
Respiratory rate > 60/min	3-6
Receiving respiratory support	3-6
The Respiratory Sequence	3-5
Core Steps, Organization of Care, Response, Next Steps, and Specific Management	3-6
The Respiratory Score	3-7
Transient tachypnea of the newborn	3-11
Respiratory distress syndrome	3-13
Meconium aspiration syndrome	3-16
Pneumothorax	3-17
Pneumonia	3-21
Persistent pulmonary hypertension of the newborn	3-22
Lung hypoplasia	3-23
Case 1 – Mild respiratory distress in a term newborn	3-25
Case 2 – Respiratory distress in a preterm newborn, initiating CPAP	3-35
Case 3 – Respiratory distress in a preterm newborn, initiating mechanical ventilation	3-44
Case 4 – Sudden deterioration in a ventilated baby	3-53
Case 5 – Meconium aspiration	3-62
Answers to Questions	3-71
Bibliography	3-73
Chapter 4 Cardiovascular	
Objectives	4-1
Key Concepts and Skills	4-2
Introduction	4-3
Alerting Signs	
Pale, mottled or grey	4-3
Weak pulses or low blood pressure	4-3
Cyanosis unresponsive to oxygen therapy	4-4
Heart rate > 220 bpm	4-4
The Cardiovascular Sequence	4-5
Core Steps, Organization of Care, Response, Next Steps, and Specific Management	4-6
Case 1 – The baby presenting with shock	4-15
Case 2 – Baby with persistent cyanosis	4-24
Case 3 – Baby with supraventricular tachycardia	4-35
Answers to Questions	4-46
Bibliography	4-47
Chapter 5 Neurology	
Objectives	5-1
Key Concepts and Skills	5-2
Introduction	5-3
Alerting Signs	
Abnormal tone	5-3
Jitteriness	5-3
Seizures	5-4
The Neurology Sequence	5-5
Core Steps, Organization of Care, Response, Next Steps, and Specific Management	5-4
Case 1 – The floppy baby	5-10
Case 2 – A 6-hour old baby with seizures	5-19
Case 3 – Baby born to a substance-using mother	5-30
Sample Neonatal Abstinence Score	5-34

Answers to Questions	5-37
Bibliography	5-38
Chapter 6 Surgical Conditions	
Objectives	6-1
Key Concepts and Skills	6-2
Introduction	6-3
Alerting Signs	
Anterior abdominal wall defect	6-3
Vomiting or inability to swallow	6-3
Abdominal distension	6-4
Delayed passage of meconium or imperforate anus	6-4
The Surgical Conditions Sequence	6-5
Core Steps, Organization of Care, Response, Next Steps, and Specific Management	6-6
Case 1 – Abdominal wall defect	6-12
Case 2 – Inability to pass a nasogastric tube	6-18
Bibliography	6-22
Chapter 7 Fluid & Glucose Management	
Objectives	7-1
Key Concepts and Skills	7-2
Introduction	7-3
Alerting Signs	
Blood glucose < 2.6 mmol/L	7-7
At risk for hypoglycemia	7-7
Not feeding or should not be fed	7-8
The Fluid & Glucose Management Sequence	7-5
Core Steps, Organization of Care, Response, Next Steps, and Specific Management	7-8
Case 1 – Infant of a diabetic mother	7-16
Case 2 – Symptomatic hypoglycemia	7-24
Answers to Questions	7-31
Bibliography	7-32
Chapter 8 Thermoregulation	
Objectives	8-1
Key Concepts	8-2
Introduction	8-3
Alerting Signs	
Axillary temperature < 36.3°C or > 37.2°C	8-3
Increased risk for temperature instability	8-4
The Thermoregulation Sequence	8-5
Core Steps, Organization of Care, Response, Next Steps, and Specific Management	8-6
Case 1 – The cold, outborn baby	8-11
Case 2 – A baby with hyperthermia	8-19
Answers to Questions	8-24
Bibliography	8-24
Chapter 9 Infection	
Objectives	9-1
Key Concepts and Skills	9-2
Introduction	9-3
Alerting Signs	
Risk factor for infection	9-3

Table of Contents

ACoRN alerting signs with an asterisk (*)	9-3
Clinical deterioration	9-4
The Infection Sequence	9-5
Core Steps, Organization of Care, Response, Next Steps, and Specific Management	9-4
Case 1 – Baby with respiratory distress and prolonged rupture of membranes	9-9
Answers to Questions	9-18
Bibliography	9-19
Chapter 10 Transport	
Objectives	10-1
Key concepts	10-2
Introduction	10-3
The transport process	10-4
Sample Neonatal Pre-transport Information Sheet	10-5
Responsibilities of:	
The sending facility	10-7
The transport coordinating physician	10-7
The receiving physician	10-8
The transport team	10-8
Shared responsibilities	10-9
Communication with the family	10-9
Bibliography	10-10
Chapter 11 Support	
Objectives	11-1
Key concepts	11-2
Introduction	11-3
Supporting the baby	11-4
Developmentally supportive care	11-6
Illustrative Case Study	11-7
Assessment and management of pain	11-8
Supporting the family	11-9
Supporting the health care team	11-11
Palliative care	11-12
Answers to Questions	11-14
Bibliography	11-15
Appendix A Neonatal assessment	
Sample neonatal assessment tool	A-3
Appendix B Review of Neonatal Resuscitation Skills	
Free-flow oxygen administration during resuscitation	B-3
Bag-and-mask ventilation	B-4
Endotracheal intubation	B-5
End-tidal CO ₂ (ETCO ₂) detectors – for endotracheal tube placement	B-7
Laryngeal mask airway	B-9
Chest compressions	B-10
Emergency vascular access: Umbilical vein catheterization	B-11
Emergency vascular access: Intraosseous vascular access	B-13
Epinephrine	B-16
Volume expander	B-17
Sodium bicarbonate	B-18

Appendix C Procedures

Blood pressure measurement	C-3
Blood sampling, capillary	C-5
Bowel bag application	C-6
Cardiorespiratory monitoring	C-8
Continuous positive airway pressure (CPAP)	C-10
Mechanical ventilation	C-12
Pneumothorax, chest transillumination	C-16
Pneumothorax, chest tube insertion	C-17
Pneumothorax, needle aspiration	C-21
Pulse oximetry	C-23

Appendix D Investigations (interpretation)

Blood gases	D-3
Complete blood count (CBC) and differential count	D-5
Chest radiographs	D-7

Appendix E Medications

Ampicillin	E-3
Cefotaxime	E-4
Cloxacillin	E-5
Dopamine	E-6
Fentanyl	E-8
Gentamicin	E-10
Morphine	E-12
Penicillin G	E-14
Phenobarbital	E-15
Phenytoin	E-16
Premedication for intubation	E-17
Prostaglandin E ₁ (PGE ₁)	E-19
Surfactant	E-21
Vancomycin	E-23

Index	I-1
--------------	-----

Sequences

The ACoRN Framework	1-4
The ACoRN Primary Survey	1-5
The ACoRN Problem List	1-5
The ACoRN Sequence design	1-10
The Resuscitation Sequence	1-15
The Respiratory Sequence	1-16
The Cardiovascular Sequence	1-17
The Neurology Sequence	1-18
The Surgical Conditions Sequence	1-19
The Fluid & Glucose Management Sequence	1-20
The Thermoregulation Sequence	1-21
The Infection Sequence	1-22

Table of Contents

Tables

The Respiratory score	3-7
Clinical assessment of circulation	4-17
Tachyarrhythmia – differentiating a stable from an unstable baby	4-38
Key features of sinus tachycardia, supraventricular tachycardia and atrial flutter	4-43
Jitteriness vs seizures	5-4
Clinical assessment of the severity of hypoxic-ischemic encephalopathy	5-25
Baseline fluid intake (oral and intravenous) for the first few days of life	7-4
Blood glucose monitoring guidelines	7-13
Suggested steps for increasing glucose intake for the treatment of hypoglycemia	7-15
The amount of glucose provided by milk and intravenous dextrose	7-22
Initial incubator temperature settings in the first 12 hours of life	8-9
Strategies for preventing heat loss	8-14
Common organisms causing neonatal sepsis (early and late onset)	9-15
Choosing initial antibiotics	9-16
Stability cues and stress cues	11-5
Morphine and fentanyl	11-9
Endotracheal tube size	B-5

Sample Forms

Contact Form for Newborn Resuscitation and Stabilization	2-11
Seizure log	5-29
Neonatal abstinence score	5-34
Neonatal Pre-Transport Information Sheet	10-5
Template for case review	11-12
Neonatal Assessment Tool	A-3

Radiographs

Transient tachypnea of the newborn	3-12
Respiratory distress syndrome	3-13
Meconium aspiration syndrome	3-16
Pneumothorax	3-17
Pneumomediastinum	3-21
Pneumonia	3-22
Congenital diaphragmatic hernia	3-23
Normal chest radiograph	4-12
Transposition of the great arteries	4-13
Patent ductus arteriosus	4-13
Duodenal atresia	6-10
Ileal atresia	6-11
Esophageal atresia/tracheo-esophageal fistula	6-21
Correct/incorrect endotracheal tube placement	B-7
Umbilical venous catheter in portal system (incorrect placement)	B-13
Chest radiograph interpretation	D-9
