The Neonatal Intensive Care Nursery

The Neonatal Intensive Care Nursery (NICU) is located on the first floor of the hospital. It contains 8 beds in a Level 2 care setting. The team of health professionals working in the NICU includes:

- **Social Workers**, who meet with families in the NICU. The Social Worker is there to help families find the services and supports they need.
- **Patient Care Coordinators (PCCs)**, who help coordinate day-to-day care. They supervise the staff nurses. You can bring any concerns about your baby's care to them.
- **Bedside Nurses**, who are specially trained in neonatal nursing. They give 24-hour care to your baby. They will keep you up-to-date about how your baby is doing and help you learn to care for your baby.
- **Lactation Consultants**, who are nurses that can help you with breastfeeding. Let your nurse know if you would like to talk to a Lactation Consultant
- **Pediatricians**, who are doctors who specialize in the care of children
- **Neonatologists**, who are pediatricians that specialize in the care of sick and premature infants.
- **Physiotherapists**, who work with babies that need extra help with their development so as to reach their full potential. Physiotherapists make referrals to community programs to follow a baby's progress. Physiotherapists also work with babies who need help clearing their lungs.

- **Registered Respiratory Therapists**, who work with babies who need breathing support. They also look after the equipment that helps babies breathe.

Places to Stay

There are Parent Rooms on the Maternity / NICU. These rooms are reserved mainly for parents who are taking their baby home the following day. But, mothers who are discharged for the Postpartum unit or who arrive under emergency circumstances may also stay in these rooms.

For longer term stays, the social worker on staff will help you to sort out accommodation. Some of the available options are outlined below. For other places to stay, please ask the social worker.
