This report contains information from forms submitted between November 15, 2009 and July 15, 2010¹

| Health Region | Percent of expected forms submitted ² | Percent of returned forms that are completed ³ | Influenza-like Illness (including H1N1 influenza) | Influenza-like Illness (including H1N1 influenza) Rate ⁴ |
|---------------|--|---|---|---|
| PHSA | 50.0 | 29.1 | 122 | 10.8 |
| NHA | 58.9 | 91.4 | 260 | 19.9 |
| FHA | 77.0 | 94.3 | 876 | 14.1 |
| VCHA | 43.3 | 96.9 | 186 | 12.1 |
| VIHA | 62.5 | 94.3 | 307 | 12.7 |
| IHA | 57.4 | 97.8 | 419 | 17.4 |
| BC | 61.3 | 85.8 | 2170 | 14.6 |

¹This date indicates submission period. Submission period does not necessarily correspond to admission/delivery date and/or date of vaccination and/or confirmed flu

²This percent is based on the number of forms submitted taken as a proportion of the number of forms expected, based on delivery counts from the previous year.

³This identifies the percent of submitted forms that have complete information

⁴This rate is calculated using ONLY the submitted forms that are complete

Births occurring at home have been excluded from the current report
