H1N1 vaccination in pregnancy rate	56.0	53.5	45.7	62.9	51.6	52.1	54.1
H1N1 only vaccination in pregnancy (no seasonal flu vaccine) ⁴	2827	854	338	493	550	712	5774
H1N1 only vaccination in pregnancy rate	45.0	35.3	26.0	45.1	35.6	29.1	38.2
Seasonal flu only vaccination in pregnancy (no H1N1 vaccine) ⁴	31	14	10	9	10	11	85
Seasonal flu only vaccination in pregnancy rate	0.5	0.6	0.8	0.8	0.6	0.4	0.6
Total Influenza (ILI, H1N1, seasonal flu) cases	876	419	260	122	186	307	2170
Total number of complete records submitted to PSBC	6391	2433	1312	693	1559	2462	14850
Influenza in pregnancy rate	13.7	17.2	19.8	17.6	11.9	12.5	14.6

¹Submission period does not necessarily correspond to admission/delivery date and/or date of vaccination and/or confirmed flu

²This percent is based on the number of forms submitted taken as a proportion of the number of forms expected, based on delivery counts from the previous year.

³This percent identifies the number of submitted forms that have complete information

⁴Vaccination can occur at anytime in pregnancy and does not necessarily correspond to submission period

Rates are calculated using ONLY the submitted forms that are complete

Births occurring at home have been excluded from the current report
